

MARTINA VARGHESE

FULL STACK WEB DEVELOPER

PROFESSIONAL PROFILE

A proficient Full Stack Web Developer with over two years of experience in both front-end and back-end development. Skilled in a variety of programming languages and development tools, I specialize in creating scalable and user-friendly web applications. My experience in management enhances my ability to lead projects effectively and collaborate with cross-functional teams. I am eager to apply my technical expertise and leadership skills to contribute meaningfully to an organization's success.

EXPERIENCE

Mediquity Pvt Ltd, Bhopal, MP

Software Developer
Feb 2024 - Present

- Contributed to frontend development using React.js and AngularJS, collaborated with backend teams for API integration, and developed backend APIs in Java; managed databases using phpMyAdmin.
- Coordinated with project owners for requirements, participated in deployments (including WAR file creation), used Git and Jenkins for version control and CI/CD, and delivered prompt and effective bug fixes and solutions.

Redsel Technology Pvt Ltd, Bhopal, MP

Software Developer
August 2023 - January 2024

- I was responsible for building responsive, accessible, and user-friendly web interfaces using React and AngularJS, while collaborating with backend teams to integrate APIs and optimize performance for a seamless user experience.

Edelweiss Finance, Mumbai, MH

Relationship Manager
July 2018 - March 2019

PROJECTS

► Caaldock.com

This software is primarily used in pharmaceutical companies to help calibration engineers ensure the accuracy of measurement and testing equipment by calibrating them to industry standards. It significantly reduces manual work by automating the calibration process, recording results, and generating certificates efficiently.

Skill - Java, Springboot, Angular JS, Auth , Apache Pdf, phpMyAdmin ,Bootstrap.

► Blood Bank

This software is used in hospitals to manage the entire blood donation process. It helps register donors, collect their blood samples, perform necessary tests, and store the data securely. The system also handles proper sampling and cross-matching to ensure safe and accurate blood transfusions before issuing blood to patients in need.

Skill - Java, Keycloak ,React JS, phpMyAdmin ,Bootstrap.
